

## Our environmental policy

By introducing the environmental management system according to DIN EN ISO 14001 we aim to meet our corporate social responsibilities, i.e. economical use of natural resources and minimum environmental impact by manufacturing our products. Beyond that we commit ourselves to comply with all relevant environmental laws and regulations and to meet this obligation by systematic implementation of applicable law and regular reviews.

In addition to our Corporate Business Principles our environmental policy will be defined by the following **Corporate Environmental Principles**:

## We aim at

- actively involving our employees in our environmental protection initiatives
- saving energy and water
- avoiding emissions, noise and waste as far as possible
- preventing potential environmental damage by careful handling of hazardous and water-polluting substances
- proactively avoiding environmental pollution - also in the event of accidents - as far as possible
- involving our suppliers and trade partners in our efforts
- a close and trusting cooperation with all authorities
- regularly reviewing, evaluating and - as far as technically and economically feasible - continuously improving our environmental protection performance
- adequately informing the public about our environmental protection initiatives
